SPE

Dear members and colleagues,

Ucapan tahniah (congratulatory announcement)

The month of July was marked by a very special achievement, and the honour which this achievement brought is proudly shared by all our section members. On behalf of the Brunei SPE section members, we offer our heartiest congratulations to our chairman, Pg Dato Paduka Hj Abu Bakar Bin Pg Seri Indera Pg Hj Ismail, who has been conferred the title - The Most Honourable Order Seri Paduka Mahkota Brunei (DPMB) Second Class by His Majesty The Sultan.

Recap

Following the very successful Brunei SPE evening 2 months ago (felt like a long time !), the committee has great pleasure to announce another exciting event. More about this later. The committee would like to express appreciation to all SPE members and fellow colleagues who had taken the time to travel to Bandar to attend the gathering at the Riverview Hotel on the 3rd of June, where our distinguished guest speaker, professor Geoff Stewart delivered a highly informative presentation on "Modern Well Test Analysis". Not surprising, the presentation ended with lively discussions around the topic, and it was particularly encouraging to see participation from all SPE members from The Petroleum Unit, BSB, Jasra-Elf and Fletcher Challenge and the contractors. The food, kindly sponsored by BSP's development function was very much enjoyed by all those present. Many thanks to our colleagues at the Petroleum Unit who arranged the Karaoke session, which was kicked off by Noriah from the Petroleum Unit. By popular request, a certain committee member by the name of Iain Percival, who also happens to be BSP's development manager was invited to share his vocal talent. Caught unprepared, Iain managed to talk his way out of song, but not out of sponsoring some members in a Walkaton event! Overall, a very enjoyable and successful SPE get together.

Coming

The next Brunei SPE get together is planned on the 2nd September 1997. The good news is, it will be at Centre Point, 7th Floor, Gadong and food will be served. This coming SPE evening will be sponsored by Fletcher Challenge, and the guest speaker is Mr. Chris Landeck from Unocal. The topic of his presentation is "Stacked Template Structure For The Development Of Marginal Discoveries Offshore East Kalimantan". The key interest of this presentation is the low cost drilling concept, something close to our hearts and not to be missed!

Newsletter

The registration is entirely on a first come first serve basis. If you are interested, please get in touch with :

What do you mean
there are no more
tickets ?
Oh ! you mean
The SPE nite was
actually last nite
!!!?
