

AICCF WEB FORUM

Shri P.B.Dhanish, AICCF Champion has created a forum for our members located at:

<http://pub22.bravenet.com/forum/1819609228>

The forum is a good place to start discussions and expect replies that are not "official". For ICCF, the forum **Correspondence Chess Message Board – TCCMB** has proved very popular. Please feel free to connect to the above website. If you wish to post a reply and join the discussion, you will need a password. You can get your password by sending an email to the Bulletin Editor at <DrAmbar@gmail.com> or P.B.Dhanish on <pbdhanish@gmail.com>

AICCF SPECIAL TOURNAMENTS IN MEMORY OF H.J.SAMTANI

These tournaments have proved to be popular among our members and entries are still open for new sections. Any member is entitled to play, the only condition is that one should not be a participant in the current AICCF Championship, 1507.

There are 5 prizes in each 15-player postal section: Rs. 1000/-, Rs. 500/-, Rs. 250/-, Rs. 150/- and Rs. 100/-. In each 4-player email sections there are two prizes (Rs. 1000/- and Rs. 500/-)

To participate, drop a post card to Shri E.G.Meherhomji or send an email to him at <pourushah@vsnl.net>. For email section, mark a copy of your email also to Santhosh Paul at <earalil@gmail.com>.

Chess is a fairy tale of 1001 blunders
Chess is mental torture
Chess is not like life... it has rules!
Chess is as much a mystery as women
Chess demands total concentration

THE AICCF BULLETIN

www.geocities.com/aiccf

Editor: Dr. A.Chatterjee <DrAmbar@gmail.com>

World Champions at the ICCF Congress,
Dresden, October 2007

Vol. 14 February 2007 No. 2

AICCF CHAMPIONSHIP ON WEBSERVER?

Dear Editor,

There is an announcement that future ICCF World Championships will be by Webserver only. Please see: <http://www.iccf.com/forum/showthread.php?t=1015>.

Similarly, we should have future AICCF Championships by Webserver only! I am fed up of sending reminders and claiming games.

P.B.Dhanish

pbdhanish AT gmail.com

During the ICCF Congress, 2006, Dresden it was announced that ICCF will allow one 15-player tournament to be hosted on the ICCF webserver free of cost every year for all member countries. Accordingly, we are likely to have the next AICCF Championship played on ICCF's webserver. –Ed.

READERS WRITE

DR. RAO'S HEALTH

Dear Editor,

I had undergone a treatment for carcinoma for the last 4 months and I am having trouble with the after effects of radiation. Hence I am not able to participate in any correspondence chess tournaments. I am sorry for the trouble.

D.R.K.S.Rao

Visakhapatnam

I pray for your health and longevity. I am sure you will continue to enjoy chess and read the Bulletin with interest. After your recovery you may be able to continue CC by post card in the domestic circuit. We well remember the achievements you made in AICCF, your autochessography, numerous letters to the editor, mathematical diversions, interest in outlandish openings and the never say die approach in your games, including

games you played against me. We hope these activities will be continued in time after your complete recovery. Anil Anand, whom you introduced, has made giant strides and is doing a fine job as Games Editor.
-Ed

Dear Editor,
I am still in shock and grief with the news about the health of Dr. D.R.K.S.Rao. I have no words to show my sentiments. I can suggest the Rajiv Gandhi Cancer Hospital for radiation therapy.

Shams Khan

Shamskham2005 [AT](mailto:Shamskham2005@yahoo.co.in) yahoo.co.in

Alan Borwell in response to Dr. Rao's message :

Dear Dr. Rao,

I was very sad to read your message and to know that that you are still having trouble with health problems. I do hope you will soon be better and be able to play CC again.

With very best wishes,
Alan

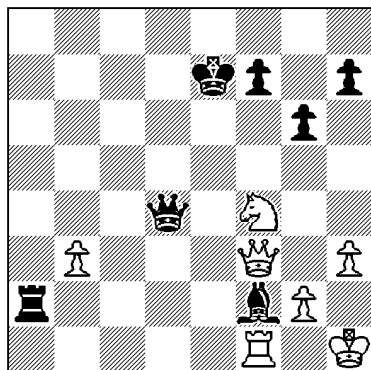

alanpborwell [AT](mailto:alanpborwell@dsl.pipex.com) dsl.pipex.com

DR. SURVEYOR'S ANSWER

Dear Editor,

On page 31 of the February 2007 Bulletin, in your article *Attack by King Move!* In the game Alekhine – Euwe, World Championship 1937 you have asked in the position after 48...Ra2 (see diagram next column) if readers can find an

even stronger move than Alekhine's 49.Ne2

Here is my answer:

49.Nd5+! K moves 50.Nc3
Rb2/Rc2 51.Ne2 wins OR
50...Rd2 51.Ne4 wins

Dr. A.B.Surveyor

drsurveyor [AT](mailto:drsurveyor@rediffmail.com) rediffmail.com

Alekhine had visualised 49.Ne2 because it blocks the black rook's defence of the bishop at f2 while simultaneously attacking black's Q. However the knight manoeuvre starting with 49.Nd5+ is even stronger. White exploits the poor placement of black's scattered pieces.
-Ed

MODAK'S ARTICLE

Dear Editor,

Please refer to the nice article 'OTB and CC Players - A Comparison' by D.M.Modak in February 2006 issue Page 27-29. The author had assured the readers that the detailed analysis will be provided in the next issue but it was not printed. Please

look into it. I am expecting more such articles from Mr. Modak.

Awani Kumar

Lucknow

Awanieva [AT](mailto:Awanieva@gmail.com) gmail.com

It is published in this issue -Ed

Dear Editor,

It is nice to hear that you are back in India. I will be always glad to meet you and share together our enthusiasm for CC. I read your interesting bulletin on the link you have given to me. You and your team deserve all our Congratulations and respect for your excellent work developing CC in your beautiful country. Please transmit my best greetings to all Indian friends of AICCF.

Amici sumus

Med Samraoui

samraoui [AT](mailto:samraoui@aol.com) aol.com

NO POSTAL!

Dear Editor,

My general suggestion is to encourage all to play by Email and personally I would prefer to play by the ICCF Webserver. After all internet is available in almost every nook and corner of the country.

Every postal tournament I have played has had problems with delays in receiving/delivering postal cards, players claiming not to receive cards etc.

In Email nobody (especially players from other federations in International play) bothers to

maintain time and this results in all kinds of hassles (exactly like what Santosh Paul wrote about in our Bulletin long back).

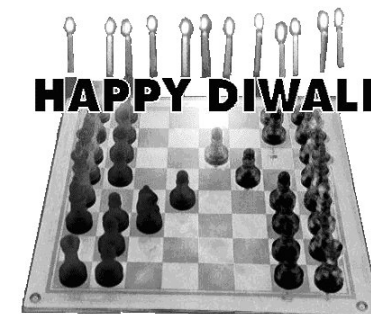

Mohan Jayaraman

mohan [AT](mailto:mohan@premier-group.co.ke) premier-group.co.ke

HAPPY DIWALI

AICCF wishes its readers a very happy Dussera and Diwali Season. What better way than to reprint the cover photo from the November 2001 issue of the AICCF Bulletin.

When you see a good move, look for a better one
-Emanuel Lasker

Strategy requires thought, tactics require observation
-Max Euwe

Modern Chess is too much concerned with things like Pawn structure. Forget it, Checkmate ends the game
-Nigel Short

PROBLEM SECTION 11

Solutions to Problems (see p. 17)

Problem no. 1

Key: 1.Rb5
Threat: None – waiting move
Variations: 1...N-random 2.Ra5
 1...Na7 2.Rb8
 1...Ka7 2.Ra5

In the set position, the knight can move to a7 stopping a mating attempt by the rook on the a file. The key move sets the stage for a contingent threat of 2.Ra5 after a random move of the knight. The error introduced by a random move is its inability to interpose on a7. A correction is 1...Na7, which permits a new mate 2.Rb8 due to a self block on a7.

The key is neatly forced as the rook's withdrawal to b4, b3, b2 or b1, though creating the same contingent threat, fail against 1...Nb6!

Problem no. 2

Key: 1.Rc4
Threat: 2.Nf4
Variations: 1...R(5)-random 2.Rd4
 1...Re4 2.Rc5
 1...N-random 2.Be4
 1...Nd4 2.Rc5
 1...Nd6 2.Rxe5

Any random move of the rook on e5 opens up the line of the black bishop on b8 defeating the threat of 2.Nf4. However the move of the rook, as a sort of compensation, also opens up the line of the white bishop on h8

giving rise to a new threat (a contingent threat) of 2.Rd4. Black can apply a correction by moving the rook to a specific square – e4. While this defeats the contingent threat, it introduces a new error of creating a self-block on e4 giving rise to a new mate – 2.Rc5. Similarly a random move of the knight opens up the line of the black rook on f8 defeating the threat of 2.Nf4. Here too there is a compensating play – opening of the line of the white bishop on h7 and self-pinning of the rook on e5 – that gives rise to another contingent threat of 2.Be5. Two specific moves – Nd4 and Nd6 - of the knight defeat the contingent threat. Both result in self-block permitting new mates – 2.Rc5 and 2.Rxe5.

This is typical example of Black Correction, which has four elements.

1. A general defence that defeats the original threat
2. A general error giving rise to a contingent threat
3. A secondary defence correcting the general error and defeating the contingent threat and
4. A secondary error permitting a new mate.

Problem no. 3

Key: 1.Be8
Threat: 2.Rxd5
Variations: 1...N-random 2.Rxc8
 1...Nxe3 2.Qxe3
 1...Nc3 2.Ba3
 1...Nb4 2.Ra5

1...Nxb6 2.Qxb6
 1...Nc7 2.Qc6
 1...Ne7 2.Qd6
 1...Nf6 2.Qxf8

Here the general defence is a random move of the knight, which will control the square d5 from where it has just moved and defeat the threat. However the absence of knight from d5 permits the contingent threat of 2.Rxc8 (if it were on d5 it could have interposed at c7). The general error is the knight's removal from d5. Of all the eight available moves of the knight only one move (Nf4) permits 2.Rxc8 mate. All the remaining seven moves of the knight become secondary defences defeating it. For instance after 1...Nxe3, the white knight's guard of d5 is eliminated and hence the R is needed on d8 to guard it and therefore cannot mate by 2.Rxc8; similarly 1...Nc3 blocks white bishop's guard on d4 and 1...Nf6 blocks the queen's guard on d6. After 1...Nxb6 and 1...Ne7 the knight guards c8 and after 1...Nb4, it can interpose on c6. It is obvious that after 1...Nc7 2.Rxc8 is not even a check!

Each of these secondary defences introduces a new secondary error permitting seven new mates. The actual play with eight different mates is very rich and exhibits a complete black knight wheel.

Problem no. 4

This problem goes a little further than the ones we have seen so far. It does not stop at a secondary defence and a secondary error; it has a tertiary defence and a tertiary error.

Key: 1.Qc8
Threat: 2.Qg8
Variations: 1...N-random 2.Rxd3
 1...Nb4 2.Ne3
 1...Nd4 2.Nb6
 1...Kxc4 2.Qxc6

The general defence, a random move of the knight provides the black king a flight square and defeats the threat. However it introduces a general error of opening the c file for the white queen, giving rise to 2.RXd3 mate. The secondary defence is 1...Nb4 protecting d3. The move introduces the secondary error of unpinning the white knight resulting in 2.Ne3 mate. Please note that both the black rooks are pinned and hence cannot capture the checking knight. Now black can try a tertiary defence – 1...Nd4 unpinning the rook on d3 and defeating 2.Ne3. However this tertiary defence leads to a tertiary error of self-block on d4 permitting a new mate – 2.Nb6!

The tertiary play is also described by some as continuous correction or corrected correction. The pinned position of two black rooks and a white knight in the set position gives rise to some interesting unpinning in the variations.

The book "Chess Problems; Introduction to an Art" co-authored by the composers of this problem with R.C.O. Matthews is a rich source of interesting problems and a treasure of information on the subject. Many of the problems in this series are sourced from it.

RESULTS AND RATINGS

A.Chatterjee <DrAmbar@gmail.com>

11 Sriniketan, Anushakti Nagar, Mumbai 400 094

The following pages are printed directly from our computer database. Please check your results and report any discrepancies to Dr. A.Chatterjee. Rating queries should include a table with Tournament Number, Opponent's Name, Opponent's Colour, Opponent's Rating, Result, Points Gained or Lost. In the event of a result not reported, it is necessary to write to the concerned Tournament Director as well.

NEW TOURNAMENTS STARTED

7-Player Single-Game Tournaments

7300 Meherhomji, N.J.Dave, Hrishikesh Chavan, H.P.Chole, M.R.Morewekar, K.Babu, Rohan Saxena (Adj. Date: 30-11-09)

Ratings are updated every 1 Jan and 1 July and remain frozen in the interim period. All results published in this Bulletin (i.e. actual results received upto 30-06-2007 and valid claims upto 31-05-2007) are rated.

INTERNATIONAL SECTION

Dr, Alok Saxena <alokasaxena@rediffmail.com>

C-102, Mahavir Sadhana, Plot 18-E,F,G, Sector 14, Nr.
Palm Beach Road, Sanpada, Navi Mumbai 400 705
Phone: 022-64503139

In order to participate in International Tournaments and for further information, please get in touch with Dr. Alok Saxena.

The fees for joining the International Section to participate in ICCF events are revised. The new rates are as follows:

- (a) Two years: Rs. 320/- OR
- (b) One time donation: Rs. 1550/-

After joining the International Section, a member can chose the ICCF event(s) he wishes to play in. We will forward the entry to ICCF. For this, the appropriate tournament fee has also to be sent. All payments should be made by bank draft/Mumbai cheque in favour of All India Correspondence Chess Federation or Money order and sent to Shri E.G.Meherhomji. We give below the fees for these tournaments:

Event Type	CHF
Olympiad Team Preliminaries (per player)	25
Champions League (per team and cycle)	60
World Individual Candidates (as first stage entry)	25
World Individual Semi-final	50
World Individual Preliminary	50
World Individual Ladies Semi-final	25
World Individual Tourneys 7-player	8
World Individual Tourneys 11-player	13
World Cup	20
Thematic Tourneys	13
Master Norm Tourneys	40
Grand Master Norm Tourneys	60
Invitation Tourneys Category I-III (per game)	2
Invitation Tourneys Category IV-VI (per game)	4
Invitation Tourneys Category VII-XIII (per game)	5
Invitation Tourneys Category XIV+ (per game)	6
Invitation Team Tourneys (per player)	4
International Open Tourneys (per entry)	4
Zonal Events (per game)	1
National Federation events (per game)	1

The current currency conversion factor presently is 1 CHF = Rs. 33.60

The last two Event Types are newly introduced. One Zonal Event for the Africa-Asia zone will be free. One National Federation Event (15-player) will be free. **This means that if we conduct the next AICCF Championship on ICCF's webserver there will no charge.**
