❖ Unix

Present Employer

Oracle India Pvt Ltd (India Development Center)

Oracle IDC is a subsidiary of Oracle Corporation, the world's largest enterprise software company. Company's main headquarters in Redwood Shores, California.

Associated as

Applications Engineer From 24th Feb 2003 to present

Overview

Having AOL project. First of its kind we are dealing within Application Development Center. Our Applications Technology Group (ATG) provides the technology foundation for the entire Oracle Applications suite, the technical guidance to Applications product development teams and building the framework that enables them to provide better information to our customers.

The ATG takes the lead in leveraging both industry and Oracle technologies to harness the full functionality of Oracle Applications by bringing together infrastructure, core technology, installation, and performance.

Our team does the groundwork for embracing the new technologies into Oracle Applications. The strengths and pitfalls involved in using new technologies are determined. The team also certifies the framework developed using the new technologies before it can be used by other Applications product development teams

Functions

- Bug resolution.
- Maintainace of autoconfig templates.
- Creation of patches, minipacks etc
- Forms Patch Certification

Accomplishments

- zDB utility (for vision databases)
- SSO 10g Integration with 11i Apps enabling throguh autoconfig.
