Say & Learn®

For all Spanish
or English levels!

Say & Learn®

This is a unique didactic-electronic game of learning language through word search puzzles with reading help, using cognitive association of images, sounds and texts.

With **SAY & LEARN**, you search a word (in Spanish or English) on an electronic word search puzzle while the machine plays and repeats continuously an audio file with the correct pronunciation of the word in the foreign language.

You must repeat the word verbally until you find it on the puzzle panel of 196 letters. A chronometer shows you the duration of the search. You can also follow a text from a small *Reading Help* with alphabetical characters describing the pronunciation.

Each phase of the game helps to stimulate your cognitive system and improves the process of learning language.

You

- Listen
- Repeat
- Read
- Search
- Identify

Learn!

SAY & LEARN teaches you words you use every day, everywhere: personal information, the family, the body, the symptoms, the bank, the child-care, the construction, and much more.

SAY & LEARN offers an effective assistance to students of non-native languages and a strategic tool for teachers/professors of foreign languages.

SAY & LEARN is an excellent partner for your family summer trips. Share great moments with your children while they get more A's in Spanish.
