

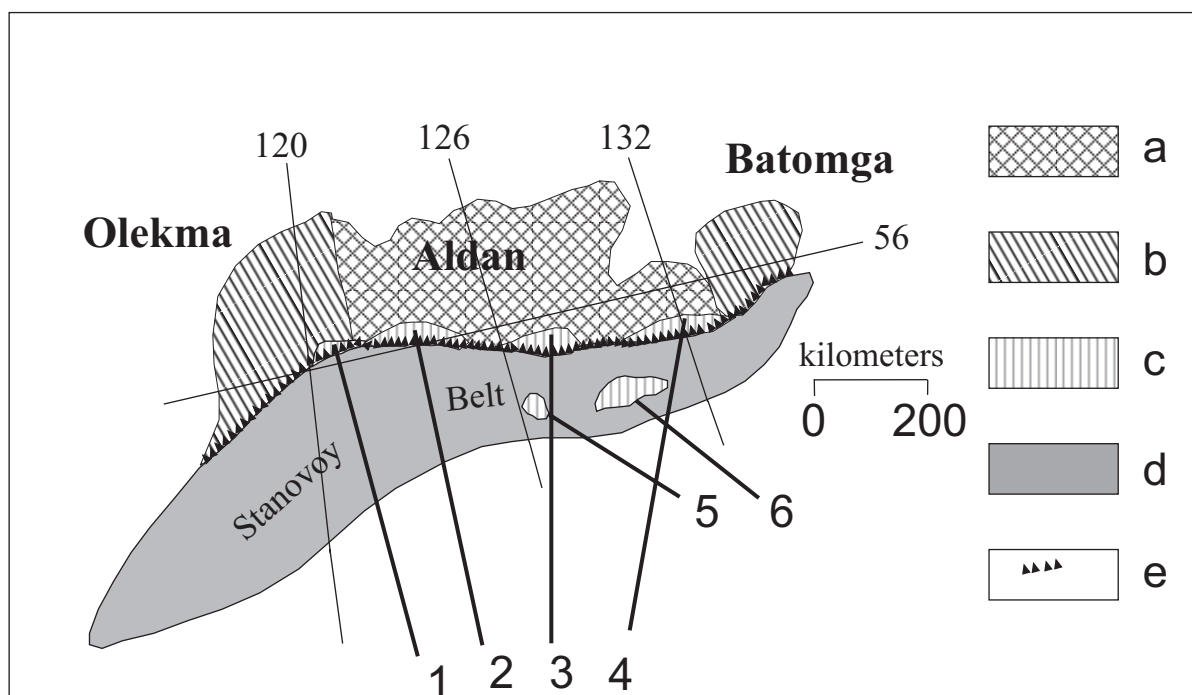

Fig. 1. Metamorphic complexes of Aldan-Stanovoy shield

- a - Archean rocks remobilized in Proterozoic time;
- b- granite-greenstone terranes of the Olekma and Batomga;
- c - high-pressure and high-temperature granulite terranes:
- 1. Kurulta; 2. Zverev; 3. Sutam; 4. Dzhugdzhur; 5. Sivakano-Tok; 6. Chogar;
- d - amphibolite terranes of the Stanovoy belt;
- e - subduction boundary of metamorphic rocks of the Stanovoy belt and the Aldan shield.
